

MARIAH CRAFT

Backend Software Engineer

Atlanta, GA · 601-307-8004 · cass.m.craft@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Motivated Python Backend Engineer with production level experience across the full software development lifecycle including development, deployment, and production support via ServiceNow. Strong experience designing, querying, and optimizing relational databases to support scalable backend systems. Hands on Frontend experience across TypeScript, JavaScript, Angular, and React. Proven track record designing and implementing RESTful APIs to support scalable, maintainable applications. Extensive experience working with Large Language Models including prompt engineering and building custom skills to extend AI-driven functionality. Debugging capabilities paired with excellent communication skills enabling effective collaboration across cross functional teams.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

Frameworks & Libraries: FastAPI, SQLAlchemy, Alembic, Flask

Databases: PostgreSQL, relational schema design, query optimization

Monitoring & Observability: Log analysis, distributed system tracing, workflow health monitoring

Tools: Claude Code, Git, Microsoft 365, Jira, Service Now

PROFESSIONAL EXPERIENCE

Analyst — Backend Systems | *Intercontinental Exchange, Inc. (ICE)* Aug 2022 – April 2026

- Maintained and improved backend systems in Python by implementing new test driven code and fixes as functionality gaps and performance issues were identified.
- Maintained and updated relational databases using SQL and SQLAlchemy, managed schema changes, and query optimization to keep data accurate and performant.
- Updated Frontend pages and data retrieval logic to reflect Backend changes ensuring consistency between how data was stored and how it was displayed to end users.
- Operated within a production engineering environment navigating real time incidents, log tracing, and root cause analysis across distributed systems.
- Monitored workflow health and data pipelines, proactively identifying degraded processes and intervening before downstream impact.

Corporate Travel Consultant | *American Express Global Business Travel* Dec 2019 – Feb 2022

- Provided travel guidance to clients at publicly traded companies prioritizing their schedules in conjunction with their travel needs
- Managed concurrent client relationships across dozens of accounts simultaneously while keeping organizational standards
- Researched booked and maintained travel itineraries via Sabre and Apollo ensuring data accuracy and downstream reporting integrity
- Delivered service remotely across multiple time zones with strong written communication in travel records

EDUCATION & TRAINING

Full Stack Development Bootcamp | *DigitalCrafts* 2022

Intensive tech bootcamp covering Python, JavaScript, REST APIs, PostgreSQL, Git, and full-stack web application development.

B.A. Anthropology | **Minor: History, Spanish** | *University of Southern Mississippi* 2016
